PROFESSIONAL SUMMARY

Aspiring Java Developer currently pursuing a B.Tech in Information Technology, with a strong foundation in Java and core programming fundamentals. Comfortable working with MySQL and MongoDB, built through hands-on academic projects, with a genuine interest in backend development and problem-solving. Seeking opportunities to apply software development skills, strengthen backend engineering expertise, and contribute to practical software solutions.

AREAS OF INTEREST

Backend Development

TECHNICAL SKILLS

Programming Language: Java

Web Technologies: HTML, CSS, JavaScript

Databases: MySQL, MongoDB

Tools: Git, GitHub, Visual Studio Code

KEY STRENGTHS

- Backend-oriented development
- Java programming fundamentals
- Database-oriented problem solving
- Web development fundamentals
- Git and GitHub workflow
- Continuous technical learning

PROFESSIONAL OBJECTIVE

To begin a career as a Java Developer and develop strong expertise in backend application development, database integration, API-oriented systems, and scalable software engineering practices.

PROJECTS

Smart Queue Management System — Hospital Token *Java, HTML, CSS, JavaScript, MySQL*

A digital queue-management concept for hospitals to organize patient tokens and streamline the waiting process.

- Designed and built a structured token allocation system to organize patient queues.
- Implemented queue tracking functionality to reduce manual queue handling.
- Integrated MySQL for reliable storage and retrieval of token and patient data.
- Built the interface using HTML, CSS, and JavaScript for a simple, usable front end.

Smart Attendance Management System *Java, HTML, CSS, JavaScript, MySQL*

A digital attendance-management system to simplify attendance recording and tracking.

- Developed core attendance logic in Java to record and manage student attendance.
- Organized attendance information for easier monitoring of student records.
- Implemented database storage and retrieval using MySQL.
- Built a basic web interface using HTML, CSS, and JavaScript.

PROJECT PORTFOLIO

1. Smart Queue Management System — Hospital Token

A hospital-oriented queue-management project designed around a token-based workflow. The system provides a structured approach to patient token handling and queue tracking, with the objective of making the waiting process more organized than manual queue management.

Technology Stack: Java, HTML, CSS, JavaScript, MySQL

Development Focus:

- Application logic using Java
- Structured patient/token data handling
- Database integration using MySQL
- Basic web interface using HTML, CSS and JavaScript

2. Smart Attendance Management System

A digital attendance-management project focused on simplifying attendance recording and tracking. The system provides a structured method for maintaining student attendance information and supporting easier record monitoring.

Technology Stack: Java, HTML, CSS, JavaScript, MySQL

Development Focus:

- Application logic using Java
- Attendance record management
- Database storage and retrieval using MySQL
- Basic web interface development

TECHNICAL PROFILE

Java: Core programming and object-oriented development fundamentals.

Frontend: HTML, CSS and JavaScript fundamentals.

Databases: MySQL and MongoDB fundamentals.

Version Control: Git and GitHub.

Development Environment: Visual Studio Code.

EDUCATION

B.Tech, Information Technology Expected 2028
Sri Shakthi Institute of Engineering and Technology, Coimbatore | **CGPA: 7.9**

Higher Secondary Certificate 2024
Kongu Vellalar Matriculation Higher Secondary School | **86%**

Secondary School Leaving Certificate 2022
Kongu Vellalar Matriculation Higher Secondary School, Tamil Nadu State Board | **96%**

CERTIFICATIONS

Introduction to AI — Google / Coursera • August 2026
Maximize Productivity With AI Tools — Google / Coursera • August 2026

CAREER PROFILE

An Information Technology undergraduate preparing for a backend-focused software development career. Primary technical interest is Java-based backend development, supported by foundational knowledge of web technologies, relational and document databases, and version-control tools.

TARGET ROLE

Java Developer
Preferred focus: Java application development, backend systems, database integration, REST/API-oriented development, and practical software engineering.

ACADEMIC SNAPSHOT

Degree: B.Tech – Information Technology
Institution: Sri Shakthi Institute of Engineering and Technology
Duration: 2024–2028
Current CGPA: 7.9
HSC: 86% — 2024
SSLC: 96% — 2022

DECLARATION

I hereby declare that the information provided in this resume is true and correct to the best of my knowledge.
